AI PROVIDERS

THE INTELLIGENCE ENGINE

11 Specialist Agents. One Button.

Each agent is purpose-built for its domain. They run in parallel, cross-reference outputs, and produce results no single model can match.

9 PROFESSIONAL DELIVERABLES — EVERY RUN — AUTOMATICALLY

PLATFORM CAPABILITIES

Everything Your Presales Team Actually Needs

Scenario Modelling

Run 3 simultaneous what-if scenarios with Brooks team scaling, seniority factors, and contract type premiums. Answer commercial questions in the room.

Live Azure Pricing

Real-time Azure Retail Prices API integration. Even infrastructure estimate backed by actual 2025 market data — not guesses or outdated price lists.

3D Architecture Viewer

Interactive Three.js fly-through of your proposed solution. Rotate, zoom, click nodes. The showstopper in every client presentation.

AI Video Narration

Generates a presenter video via HeyGen, D-ID, or ElevenLabs. Your proposal presents itself before meeting even starts. Download as MP4.

Continuous Learning

Records actual vs estimated hours/cost. Derives correction factors per tech category. Future estimates automatically get more accurate over time.

Scope Completeness

Agent 0 analyses your document before the main pipeline — identifying gaps and generating a checklist of questions to ask before submission.

Proposal-Aware Chat

AI chat with full context of your specific proposal. Not generic answers — answers rooted in your actual scope, costs, risks, and architecture.

Persistent Run Library

Every estimation auto-saved to SQLite with client details extracted. Architect review gate, searchable history, restore any run. Nothing is ever lost.

Command Palette

Press Ctrl+K. Navigate, download, test connections — all without touching the mouse. Built for power users who live in the tool every day.

WHY ECI ESTIMATE

The Tool Your Competitors Don't Have

Capability	Manual Process	Generic AI Tool	■ ECI Estimate
Time to first proposal	8–40 hours	2–4 hours	< 90 seconds
Estimate consistency	Low variance	Medium	±8% across team
Live infrastructure pricing	Manual lookup	None	Azure Retail API
Risk identification	Ad hoc	Basic	Scored register
Scenario modelling	Hours of rework	None	3 scenarios live
Learns from past projects	Tribal knowledge	None	Auto-corrected
3D architecture view	Hire a designer	None	Three.js viewer
AI video narration	Hire presenter	None	HeyGen / D-ID
Multi-model AI support	N/A	Single vendor	5 providers
Cost per proposal	£800–£3,000	£200+/month	Under £1

RETURN ON INVESTMENT — THE ARITHMETIC

■ Time saved 38 hours → 90 seconds per proposal 99.9% faster	■ Cost per proposal Under £1 vs £800–£3,000 manual 3000x cheaper	■ Throughput increase 2–3 per week → 20+ per consultant 8x more capacity	■ Quality consistency Every consultant at senior level Measurable
